Town of Renfrew
127 Raglan Street South
Renfrew, Ontario
K7V 1P8

Addendum No. 1

Date: September 22, 2026

Project No. 2026-17-DE

Project: Grinding of Stockpiled Landfill Material at the Renfrew Landfill

To: All Bidders

Pre-Bid Questions

1. **Question:** Would the Town be able to provide an estimated tonnage or volume of the material currently stockpiled for grinding?

Answer: The Town is not able to provide this information. The Town does not weigh specific material types separately in a way that would provide accurate data.

2. **Question:** Would the Town be able to provide the tonnage/volume processed during the 2024 and/or 2025 grinding programs, if available?

Answer: This information is not available.

3. **Question:** Would the Town be able to provide confirmation as to whether the contractor is permitted to pre-sort and remove unsuitable material such as steel, concrete and rocks from the stockpiles within the grinding area prior to commencing the grinding operation, and advise if there are any specific requirements regarding where the separated unsuitable material is to be placed?

Answer: The Town would permit pre-sorting as long as the contractor could maintain adequate and safe space for customers to continue to drop off materials in the vicinity of the piles and maintain access to the Landfill's fuel tank (located behind the hazardous waste depot). The landfill has a metal bin for metal items and would be able re-locate any concrete or rocks that were pulled out of the pile provided that this material is placed in a location that is accessible by our wheel loader.

Please attach this addendum to your Tender document and be governed accordingly. Bidders must acknowledge receipt of all addenda.
